

ARCHITECTURAL INTEGRATION OF LIGHT-TRANSMISSIVE PHOTOVOLTAIC SYSTEMS

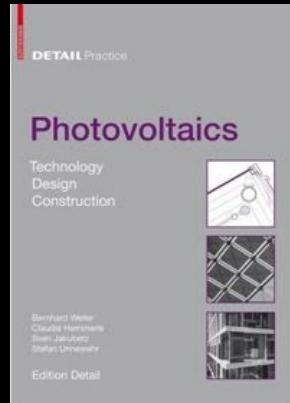

Robert BAUM

Department of Architecture, The University of Tokyo, Japan

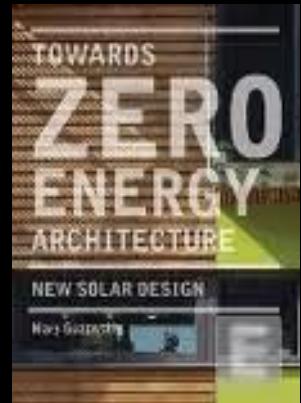

1. Introduction
2. Translucency and transparency
3. Analysis of crystalline silicon PV
4. Analysis of thin-film PV
5. Analysis of PV independent variations
6. Discussion and outlook

Opaque PV

Light-Transmissive PV

Fig.1 © Allmann Sattler Wappner Architekten, München

Fig.2 © Scheuten Solar

Light-Transmissive PV

Translucent or semi-transparent properties and qualities:

- ability to change the degree of light-transmittance,
- for illumination or shading,
- for allowing or preventing views,
- for letting in desired heat gains,
- for blocking undesired heat loads,
- fulfilling the basic function of PV as power generator,
- plus aesthetic qualities of rich shadow plays, colour and texture,

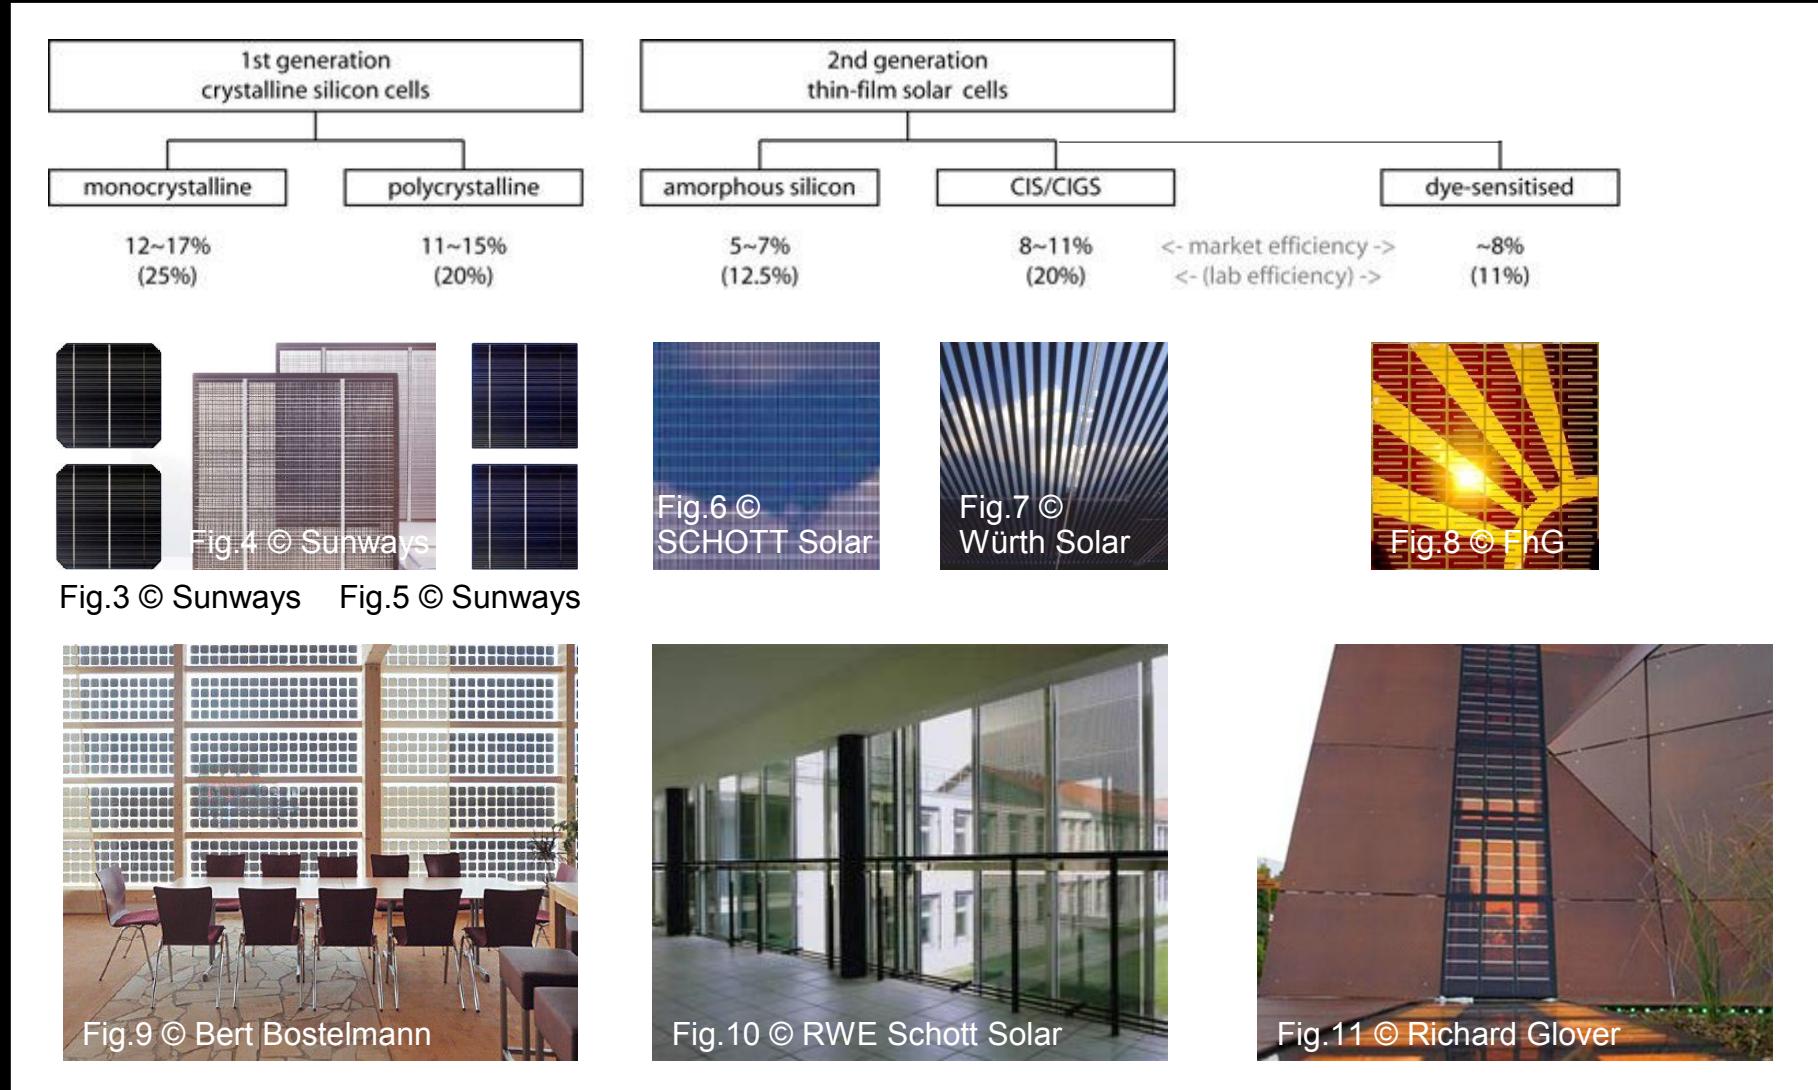

all in one building and architectural element.

6. Discussion and outlook

Design parameters for crystalline silicon and thin-film PV laminates

Crystalline silicon		
No.	Design parameter	Comment
1	PV technology	c-si, mc-si
2	Cell shape	Attr.2
3	Cell size	Attr.3, 4
4	Cell colour	limited range
5a	Cell spacing between strings	Attr.5, 6, 8
5b	Cell spacing within a string	Attr. 6, 8, 12
6	String length	Attr.9:C, 10-12
7	String position	Attr.4, 7, 9
8	String orientation	Attr.9:A, 11
9	non-PV elements	dummy cells, screen prints, coloured interlayers, art
10	laminate	glass or film, bent glass

Thin-film		
No.	Design parameter	Comment
1	PV technology	a-si, CIS/CIGS, DSC
2	Sheet shape	usually rectangular
3	Sheet size	manufacturer dependent
4	Sheet colour	limited range
5	'see-through' pattern	manufacturer dependent
6	'see-through' transparency	manufacturer dependent
7	Sheet position	variable
8	Sheet orientation	variable
9	non-PV elements	dummy cells, screen prints, coloured interlayers, art
10	laminate	glass or film, bent glass

*“This is not a dream, because
technology plus poetry equals architecture [...].
All architects [...] have to do is make it happen.”*

(Wigginton, 1996, p.238)

Thank you for your attention

Robert BAUM
